---

Profile Summary

DevOps & Cloud Engineer with 4 years of experience architecting and operating production-grade AWS and Kubernetes platforms supporting microservices-based applications. Specialized in CI/CD automation, infrastructure as code, GitOps-driven deployments, and cost optimization across multi-environment clusters. Experienced in resolving complex production issues, improving system reliability, and enabling zero-downtime deployments. Experience working in Agile/Scrum environments and collaborating with cross-functional teams.

TECHNICAL SKILLS

Cloud & Infrastructure:
Amazon Web Services (EC2, EKS, VPC, IAM, RDS, S3, Lambda, CloudWatch), High availability, Auto Scaling, Cost Optimization

Containerization & Orchestration:
Kubernetes (HPA, Namespaces, RBAC), Docker, Helm

CI/CD & GitOps:
Jenkins (Pipeline as Code), Argo CD, GitOps, Maven, Nexus

Infrastructure as Code & Automation:
Terraform, Ansible, Infrastructure Automation

Monitoring & Observability:
Prometheus, Grafana, Alerting, Log Monitoring

Security & DevSecOps:
SonarQube, Trivy, IAM Policy Management

Scripting & OS:
Python, Shell Scripting, Linux

Work Experience

Bristlecone India Limited
Role: DevOps Engineer
Duration: March 2022 – Present

Project 1: Cloud Infrastructure Automation & CI/CD Optimization

- Owned **CI/CD** pipelines supporting **25+ microservices** deployed on 3 Kubernetes clusters **(Dev, QA, Prod),** increasing deployment frequency and reducing release failures by **40%**.

- Designed **GitOps-based** deployment workflows using **Argo CD**, enabling consistent and auditable Kubernetes deployments.
- Automated cloud infrastructure provisioning using **Terraform** across **AWS** reducing manual provisioning effort by **60**% and improving environment consistency.
- Implemented **Helm-based** application deployments with **rolling updates and autoscaling**, ensuring zero-downtime releases in production.
- Optimized Kubernetes resource requests/limits and rightsized EC2 instances, reducing monthly cloud infrastructure costs by ~15%.
- Integrated **SonarQube** into **CI/CD pipelines**, improving code quality metrics by 30% and reducing security vulnerabilities by 20%.
- Built centralized monitoring and alerting using **Prometheus** and **Grafana**, reducing mean time to detect (**MTTD**) and system downtime by 15%.
- Troubleshot complex **Kubernetes** pod scheduling and cluster stability issues by **analyzing node pressure**, **taints/tolerations**, and **autoscaling behavior** in live production environments.
- Resolved critical **AWS VPC peering** and **routing issues** by reconfiguring route tables and security groups, reducing application network latency **by 25%.**
- Designed and maintained multi-environment **AWS architecture** including **VPCs**, subnets, **ALBs**, **IAM** roles, and **EKS** clusters ensuring fault tolerant architecture.
- Participated in production incident response, performed **root cause analysis (RCA)**, and reduced mean time to recovery (MTTR) through proactive monitoring improvements.
- Configured **Horizontal Pod Autoscaling (HPA)**, readiness and liveness probes, and resource optimization strategies to improve application resilience.
- Integrated container image scanning using **Trivy** and enforced security best practices across **CI/CD** workflows.
- Experienced in managing Kubernetes clusters **(EKS)** across **Dev**, **QA**, and **Production** with centralized **GitOps-based** deployments.

Project 2: CI/CD & Cloud Operations

- Developed and maintained **CI/CD pipelines** for Java-based applications using **Jenkins, Git, Maven, and JFrog**, reducing build and deployment times by 20%.
- Implemented **AWS IAM** roles and least-privilege policies to secure access to cloud resources.
- Supported **cloud cost optimization** initiatives by identifying underutilized EC2 resources and assisting in rightsizing efforts.
- Assisted in operational automation using **AWS Lambda** for routine infrastructure tasks.
- Wrote **Ansible playbooks** to configure and manage Linux servers across environments.

Education

Chaitanya Deemed University – Post-Graduation (2022)
